ELSEVIER

European Journal of Operational Research 84 (1995) 713–715

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 84

Special Issue: Decision Technology and Intelligent Decision Support

1 Decision Technology and Intelligent Decision Support
D.W. Bunn and B.G. Silverman
5 Monitoring for hazard in flight management systems
A.D. Greenberg, R.L. Small, J.P. Zenyuh and M.D. Skidmore
25 MACRAME: A problem formulation and model structuring assistant in multiactorial contexts
M.F. Norese
35 Knowledge-based DSS for construction contractor prescreening
M.A. Taha, S.C. Park and J.S. Russell
47 A knowledge-based model management system for aircraft survivability analysis
A.S.M. Masud, P. Metcalf and D. Hommertzheim
60 An intelligent interactive Project Management Support System
F.J. Jüngen and W. Kowalczyk
82 Industrial linear optimization problems solved by constraint logic programming
R. Bisdorff and S. Laurent
96 An experiment in scheduling and planning of non-structured jobs: Lessons learned from artificial intelligence and operational research toolbox
C.A. Ntuen and E.H. Park
116 R&D Decision Advisor: An interactive approach to normative decision system model construction
P.J. Regan and S. Holtzman
134 Interactive decision aiding for group decision support
A.A. Salo
150 Acquiring expert rules with the aid of decision tables
J.P. Seagle and P. Duchessi
163 The impact of semantic ambiguity on Bayesian weights
D.E. O'Leary
170 CEG: A case based decision modeling architecture
V.S. Moustakis
192 Dynamic grouping of parts in flexible manufacturing systems – A self-organizing neural networks approach
U.R. Kulkarni and M.Y. Kiang
213 System design and evaluation using discrete event simulation with AI
J.R. Clymer

227 Symbiotic systems: Exploiting human creativity
M. Scriabin, D.B. Kotak and K.G. Whale
235 The effects of learning on the firm's optimal design quality path
P. Kouvelis and S.K. Mukhopadhyay
250 A tactical model for airing new seasonal products
D. Kim, D.G. Morrison and C.S. Tang
265 Alternative growth versus security in continuous dynamic trading
T. Dohi, H. Tanaka, N. Kaio and S. Osaki
279 Implementing a subjective MCI model: An application to the furniture market
G. Cliquet

292 NICHER: An approach to identifying defensible product positions
D. Sudharshan, K.R. Kumar and T.S. Gruca
310 Information theory as a unifying statistical approach for use in marketing research
P.L. Brockett, A. Charnes, W.W. Cooper, D. Learner and F.Y. Phillips
330 The scheduling problem where multiple machines compete for a common local buffer
I. Khosla
343 Minimizing the number of tardy jobs for m parallel machines
J.C. Ho and Y.-L. Chang
356 Simultaneous determination of the cutting speed and lot size values in machining systems
C.P. Koulamas
371 Joint product durability and lot sizing models
D. Gupta and Y. Gerchak
385 A fixed interval due-date scheduling problem with earliness and due-date costs
D. Chhajed
402 A two reorder level inventory system with renewal demands
S. Kalpakam and K.P. Sapna
416 A comparative analysis of approaches for determining optimal price and order quantity when a sale increases demand
A. Ardalan
431 Analysis of a (Q, r, T) inventory policy with deterministic and random yields when future supply is uncertain
M. Parlar and D. Perry
444 Stochastic analysis of a continuous review perishable inventory system with positive lead time and Poisson demand
N. Ravichandran
458 The newsboy problem under progressive multiple discounts
M. Khouja
467 Marginal cost criteria for preventive replacement of a group of components
R. Dekker and I.F.K. Roelvink
481 A multiobjective optimization approach to thermal generating units maintenance scheduling
B. Kralj and R. Petrovic
494 OR Software
ORSEP – Operations Research Software Exchange Program, *H.W. Hamacher (ed.)*
UGC: An algorithm for two-stage unconstrained guillotine cutting, *A. Van Der Wilt*
499 Book Reviews, *L.F. Gelders (ed.)*
Advances in Equilibrium Modeling, Analysis and Computation (Annals of Operations Research, Vol. 44), A. Nagurney (ed.)
Choix Multicritères dans l'Entreprise, Principe et Pratique, J.-C. Pomerol and S. Barba Romero
Solutions in Statistics and Probability, E.J. Dudewicz
Operations Research and the Public Sector, S.M. Pollock, M.H. Rothkopf and A. Barnett (eds.)

Special Issue: Cutting and Packing

503 Cutting and Packing
E.E. Bischoff and G. Wäscher
506 Solution approaches to irregular nesting problems
K.A. Dowsland and W.B. Dowsland
522 A new algorithm for the minimal-area convex enclosure problem
R.B. Grinde and T.M. Cavalier
539 Compaction and separation algorithms for non-convex polygons and their applications
Z. Li and V. Milenkovic
562 The modified integer round-up property of the one-dimensional cutting stock problem
G. Scheithauer and J. Terno
572 CUTGEN1: A problem generator for the Standard One-dimensional Cutting Stock Problem
T. Gau and G. Wäscher
580 An LP-based approach to a two-stage cutting stock problem
J.M. Valério de Carvalho and A.J. Guimarães Rodrigues
590 Establishing the optimality of sequencing heuristics for cutting stock problems
B.J. Yuen and K.V. Richardson

599 An AND/OR-graph approach to the solution of two-dimensional non-guillotine cutting problems
M. Arenales and R. Morabito
618 An approximation algorithm for solving unconstrained two-dimensional knapsack problems
D. Fayard and V. Zissimopoulos
633 Exact solutions for constrained two-dimensional cutting problems
V. Parada Daza, A. Gómes de Alvarenga and J. de Diego
645 Guillotineable bin packing: A genetic approach
B. Kröger
662 How to use structural constraints to compute an upper bound for the pallet loading problem
J. Nelißen
681 Loading pallets with non-identical items
E.E. Bischoff, F. Janetz and M.S.W. Ratcliff
693 Packing different-sized circles into a rectangular container
J.A. George, J.M. George and B.W. Lamar
713 Contents Volume 84
